

WHAT IS CLAIMED

1. An antibacterial tissue including:

an upper planar shaped absorbent member;

an intermediate planar shaped absorbent member having a plurality of apertures formed therein coupled to the upper planar shaped absorbent member;

an antibacterial member formed on an upper surface of the intermediate planar shaped absorbent member between the upper planar shaped absorbent member and the intermediate planar shaped absorbent member; and

a lower planar shaped absorbent member coupled to a lower surface of the intermediate planar shaped absorbent member.

2. An antibacterial tissue as defined in claim 1 wherein the upper planar shaped absorbent member includes a thin paper-like absorbent material.

3. An antibacterial tissue as defined in claim 2 wherein the intermediate planar shaped absorbent member includes a thin paper-like material having a plurality of openings formed therein.

4. An antibacterial tissue as defined in Claim 3 wherein the antibacterial member is a dry antibacterial member which is activated by moisture.

Sub
A1

5. An antibacterial tissue as defined in Claim 4 wherein the antibacterial member includes a layer of antibacterial soap.
6. An antibacterial tissue as defined in Claim 4 wherein the antibacterial member includes a layer of betadine.

7. An antibacterial tissue including:

an upper planar shaped absorbent member;

a lower planar shaped absorbent member having a plurality
of apertures formed therein coupled to the upper planar shaped
absorbent member; and

an antibacterial member formed on an upper surface of the
lower planar shaped absorbent member between the upper planar
shaped absorbent member and the lower planar shaped absorbent
member.

8. An antibacterial tissue as defined in claim 7 wherein the
upper planar shaped absorbent member includes a thin paper-
like absorbent material.

9. An antibacterial tissue as defined in claim 8 wherein the
lower planar shaped absorbent member includes a thin paper-
like material having a plurality of openings formed therein.

10. An antibacterial tissue as defined in Claim 9 wherein the
antibacterial member is a dry antibacterial member which is
activated by moisture.

11. An antibacterial tissue as defined in Claim 10 wherein the
antibacterial member includes a layer of antibacterial soap.

12. An antibacterial tissue as defined in Claim 10 wherein the
antibacterial member includes a layer of betadine.
